

Summer Math Challenge

It is time for our Summer Math Challenge!

We will use the IXL Summer Math Boost - a preset list of twenty skills that are a great review of this year's content. All of our students have used the IXL platform this year and are familiar with how to use the program.

1. Students will log into the St. Paul School CLEVER page to access IXL. Type in this link <https://tinyurl.com/mwudvfyv> or scan QR code.
2. Students will click on IXL.
3. In IXL, your child will go to LEARNING, SKILL PLANS, and then IXL PLANS. The Summer Math Boost has been pinned for your child.

The IXL Summer Math Boost has 20 skills for students to complete over the summer, with a minimum smartscore of 80. The Summer boost is set up with 20 skills over 4 weeks, but we suggest that the students **SPREAD IT OUT AND DO 2 OF THE SKILLS EACH WEEK** over the summer. Studies show that retention of facts is greatest when skills are practiced each week.

To encourage the kids to keep up their skills, we have developed the following reward system:

1. All participants will receive a pencil.
2. **Completion Prize** - anyone who completes **ALL 20 SKILLS** from the Boost (between May 23 and August 22) will receive an out-of-uniform pass, to be used on a date approved by his/her homeroom teacher.
3. **Prizes** - students will receive one chip for each skill completed, and will get to “purchase” prizes from our “math challenge store”.

If you have any questions, please feel free to contact:

Mrs. Eibel - keibel@stpaulnky.org

Thank you!
